

Eric Lawrence Dapp, Performance / Functional Automation Test Engineer (And an acquisition survivor)

EXPERIENCE

Client Services and Adoption Engineer

Broadcom | November 2018 – Present

- Act as the end user's voice within R&D and advocate for fixes and features that most impact usability and value.
- Guide and consult on Performance and Automated testing implementations with our biggest customers including two of the largest banks in the US.
- Design and automate new testing solutions within the boundaries of the product, saving dev time to focus on critical features.

Professional Services Engineer

CA Technologies | May 2018 – November 2018

- Designed and Managed massive web performance test events with a focus of meeting client requirements and delivering in tight timelines.

Presales Engineer

CA Technologies | Feb 2017 – May 2018

- Provided technical solutions to prospective customers to support the Enterprise and Digital Sales Teams throughout the entire sales cycle.
